KNEEL PAD

In a publication 'Making it Right' by Worksafe BC, the use of Knee Pads to help reduce stress to the knees is recommended.

By relieving 'Contact Stress' - the pressure and discomfort associated with physical contact between parts of the body and hard objects or surfaces (like concrete and hard floors) - the Kneel Pad offers over an inch of support.

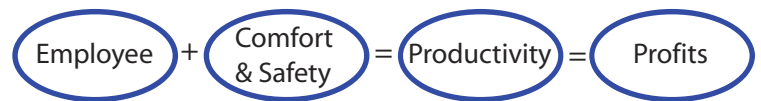

Made with 1/8" recycled rubber on both top and bottom and 1" of soft polyurethane foam in the middle, the Kneel Pad helps to prevent knee injury and chronic aches and pain.

IMAGINE FOR A MOMENT

the productivity and lack of down-time if all your employees could perform their daily tasks pain-free. With the use of the Kneel Pad we can help you to reach this goal.

The Kneel Pad can improve both comfort and safety for your employees.

**"PRECAUTION IS BETTER THAN
CURE"**

KNEEL PAD

The Kneel Pads are individually hand crafted; made with 1/8" thick recycled rubber on top and bottom and 1" of soft polyurethane foam injection-molded between the rubber pieces.

The interface between the top and bottom surface, and the foam core is unparalleled and creates a bond that will outlast the competitors' products.

The Kneel Pad is extremely durable and will withstand day to day ablation in the most demanding work environments. We've exposed them to some pretty tough conditions and they have surpassed our expectations.

The sturdy design with simple strap handle is rugged enough for industrial environments and compact enough to be repositioned at any work station.

The non-slip properties of the rubber make the Kneel Pads ideal for any floor surface.

Ideal for Welders, Machinists, Assembly line workers, Mechanics ... if kneeling is required while working, this product is the answer.

Available Sizes

KP2412 - 24" x 12"

KP3012 - 30" x 12"

KP3612 - 36" x 12"

KP2418 - 24" x 18"

KP3018 - 30" x 18"

KP3618 - 36" x 18"

With six different sizes to choose from, there is virtually a Kneel Pad to suit any job.

ENVIRONMENTAL IMPACT

The top and bottom rubber surface of the Kneel Pad contains material that is 100% post-production waste, which makes it 100% recycled. For those seeking credit points for products recognized by LEEDS (Leadership in Energy & Environmental Design), the Kneel Pad is an excellent choice.

IC Urethane Products Inc. strives to reduce the environmental impact of our operation to a minimum and we are thus proud to claim that we do not use any VOC or PVC materials in our manufacturing process and end products.

We have set the bar
by which all others are measured.
