

**SUPREME COMFORT
ENVIRONMENTALLY FRIENDLY DESIGN**

Specifications:

- * Mats are individually hand-crafted
- * 1/8" thick Recycled Rubber on top
- * 5/8" thick soft polyurethane foam in the middle
- * Designed for tough working environments
- * Strong enough for Welders and Machinists yet attractive enough for Store and Office use
- * Several practical sizes to choose from
- * Adaptable for most work stations
- * Non-slip properties of rubber help to keep the mats from sliding

Benefits:

- * Offers support to feet, legs, back and neck
- * Promotes better posture and circulation
- * Helps to prevent musculoskeletal injuries, body fatigue and chronic aches and pains associated with standing for long periods of time on hard floor surfaces
- * Improves comfort and safety
- * Increases sense of well-being
- * Helps reduce down-time due to complaints of discomfort and fatigue

Cross Section

**RECYCLED BLACK
RUBBER**

- VIT3018R2F - 30" x 18"
- VIT3422R2F - 34" x 22"
- VIT3618R2F - 36" x 18"
- VIT3624R2F - 36" x 24"
- VIT3834R2F - 38" x 34"

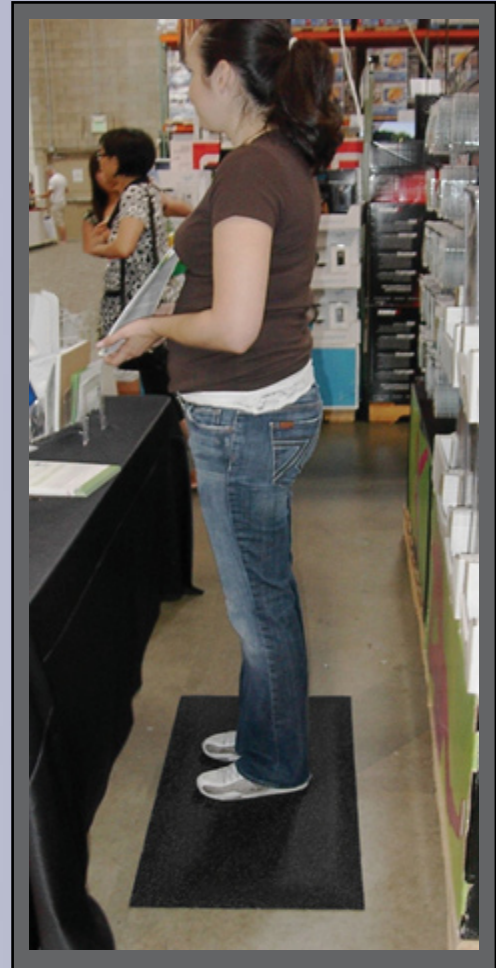

ANTI-FATIGUE MATS

Static standing on hard floor surfaces such as concrete or ceramic tile, causes strain and stress on muscles and joints and restricts normal blood flow. This in turn can produce pain and discomfort and causes the body to feel weak and tired. Subjecting the body to this kind of discomfort day after day can cause musculoskeletal pain, chronic health issues, and chronic fatigue, all of which can result in considerable down time due to absenteeism.

Unlike most Anti-fatigue mats on the market today, we have engineered the Vitality Anti-fatigue Mat combining the strength and durability of recycled rubber for the top with the soft-cushion characteristics of polyurethane foam for the core. The end result is a product that performs much like a shock absorber, subtly reacting to shifts in body movement, promoting better posture and circulation and providing a comfortable barrier between the user and the hard floor surface.

A Company that places the health and safety of their employees as a top priority, reap the benefits by using the Vitality Anti-fatigue Mats. An employee who is happy, healthy and provided a safe and comfortable working environment in which to practice his/her trade, is more likely to be productive and achieve the results the Company is seeking.

Let us help you to provide this kind of working environment for your employees by providing them with Vitality Anti-fatigue Mats.

The top rubber surface of the Vitality Anti-fatigue mat contains material that is 100% post-production waste, which makes it 100% recycled. For those seeking credit points for products recognized by LEEDS (Leadership in Energy & Environmental Design), the Vitality Anti-fatigue Mat is an excellent choice.

IC Urethane Products Inc. strives to reduce the environmental impact of our operation to a minimum and we are thus proud to claim that we do not use any VOC or PVC materials in our manufacturing process and end products.
